DETAILED ACTION

Terminal Disclaimer

The terminal disclaimer filed on January 4, 2007 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent 6,691,790 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 46 and 48 recite the limitation "flexible conduit" in line 2 of each of the claims. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 45 and 47 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 3,389,884 to Ault

Regarding claim 45, and 47, Ault discloses a housing (14) defining an internal volume within which a sprinkler head is received, the housing having an open face and an aperture (@ 15) through which a conduit (connecting to (12)) extends to connect to the sprinkler head and a removable cover (17) which covers the open face of the housing and has an opening configured to receive the sprinkler head.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 46 and 48 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 3,389,884 to Ault.

The rejection of claims 45 and 47 above serves as the basis for the following. Ault does not teach an elbow joint and flexible conduit, however it would have been obvious to one having ordinary skill in the art at the time the invention was made to have employed elbow joints and flexible conduit since both entities are notoriously well known in the plumbing arts as viable piping solutions in the construction of sprinkler systems, and are widely available commercially to the general populace.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure is as follows:
